- Trustless
- Peer-To-Peer

The Future Of Crypto Trading

AtomicDEX is the industry's only decentralized exchange to use atomic swap technology. It's the fully decentralized trading solution that we've all been waiting for.

Secure

AtomicDEX lets you make atomic swaps. No middleman, no trusted third parties. You always keep your keys, you always keep your coins.

Efficient

Market makers pay no fees on AtomicDEX. Takers pay just 0.15% of the total value of the trade. There's never any need to make deposits or withdrawals.

Simple

AtomicDEX is so easy to use that your grandma could make trades. You can start making atomic swaps with just a few taps.

Flexible

AtomicDEX currently supports 15 different assets, including both Bitcoin protocol coins and ERC tokens. Trading pairs are unrestricted so you can swap between any 2 assets.
